NOTES

- *1 Two adults on power tower S. of lagoon and also the tower S. of the S. viewing tower. SEE MORE NOTES.
- *2 An adult chased E. to W. by crows, as seen by both teams and a second year juvenile hunting the meadows.
- *3 One SW. resident adult on territory; both NW adults on territory, seen copulating and male visiting the nest.
- *4 Seen by all at eye level, as it was foraging, six feet away in the firs atop the grassy knoll.
- *5 Both Audubon's and Myrtles Warblers were observed, but not further distinguished by numbers, as to race.
- *6 Seen by all in the firs atop the grassy knoll, as we finished up the census.

MORE NOTES

The first eagle arrived at 8:20 and the mate 8:30. The ponds team saw the copulation. Both were there to the end. A recent event to remove invasive species made for better views into the main lagoon and constructed wetlands.
